

COMMUNITY NOTICE – SEPTEMBER 18, 2019

## Upcoming Soil Investigation Work Near Great Northern Way

On October 18, 21, 22, and 28, the Ministry of Transportation and Infrastructure will be undertaking field work near Great Northern Way. This field work will include soil investigations and is being done to better understand sub-surface conditions prior to the start of construction of the Broadway Subway Project in 2020.

Soil investigation will include the use of a truck-mounted drill rig to collect soil and groundwater samples at various sites. All investigations will be supported by archaeology monitors from local First Nations and all soil removed will be replaced to leave the area intact.

We do not anticipate any traffic impacts related to this work; however, parking will be intermittently restricted adjacent to some of the test areas. Noise will be minimal and will comply with relevant City of Vancouver noise bylaws.

If you have any questions, please contact [broadwaysubway@gov.bc.ca](mailto:broadwaysubway@gov.bc.ca).

Thank you,

The Broadway Subway Project Team
