

Traffic deck installation starts in Mount Pleasant in October

October 18, 2021

The Broadway Subway Project Corporation (BSPC) is in your neighbourhood building an at-grade, safe and consistent four-lane traffic deck. Late in October, installation of the traffic deck will start on the north side of E. Broadway, starting from Main Street and moving west towards Quebec Street. This work involves placing support beams and deck plates at night and then bolting the traffic deck in place during the day. Once work on the northside is complete, traffic will shift to the north and traffic deck installation work will continue on the south side of E. Broadway. Work is expected to be completed by the end of the year.

Residents and businesses may experience some noise and vibration during the installation and bolting of the traffic deck. People in the area should expect congestion, possible temporary lane closures, and reduced street parking, speed limits and travel lanes. We also anticipate sidewalk modifications on Quebec Street at E. Broadway. Please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs. Check out our Project [video](#) for more details on how we are building the traffic deck. The shaded area on map below illustrates the area of work.

Please note, this information is current at the time of sending, however schedules are subject to change. BSPC will share more specific timeframes in advance of the work happening. For the most current details, visit www.broadwaysubway.ca.
