

Night Work to install the traffic deck in Mount Pleasant starts on November 3

October 29, 2021

Note: The notice from October 18 included this work and we now have current times for night activities.

The installation of the traffic deck will start on the north side of E. Broadway, starting from Main Street and moving west to Quebec Street. This work involves placing support beams and deck plates at night and then bolting the traffic deck in place during the day. See our infographic on how a traffic deck is built at <https://www.broadwaysubway.ca/construction/photos-and-videos/>.

What to Expect

Daytime work will begin at 7 a.m. with 2 eastbound and 1 westbound lanes of traffic on E. Broadway. During work overnight from 12 a.m. to 5 a.m., there will be a single, alternating lane on E. Broadway between Quebec and Main streets with 10-minute lane closures for crane movements. As well, traffic on E. Broadway is reduced to one lane in each direction between Main and Quebec streets from 10 a.m. – 3 p.m. Monday-Saturday until mid-November. There may be occasional work on Saturday and Sunday.

Residents and businesses may experience elevated noise and vibration, including bolt fastening sounds from impact driver tools. Pedestrians will be detoured around work zones as required.

We also anticipate sidewalk modifications on Quebec Street north of E. Broadway. Please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs. Flaggers and signs will assist pedestrians and cyclists navigate.

Please note, this information is current at the time of sending; however, schedules are subject to change. Visit www.broadwaysubway.ca for current details.
