

Traffic deck installation starts in South Granville in March

February 23, 2022

The Broadway Subway Project Corporation (BSPC) is in your neighbourhood building an at-grade, safe and consistent four-lane traffic deck on W. Broadway between Granville and Hemlock streets. This work involves placing support beams and deck plates at night using large cranes and then bolting the traffic deck in place during the day. Temporary street lighting will also be installed to maintain street illumination. The traffic deck will first be installed on the south side of W. Broadway and will continue on the north side. Completion is expected in summer 2022.

Residents and businesses will experience some noise and vibration during the installation and bolting of the traffic deck. People should expect congestion, possible temporary lane shifts and closures, sidewalk modifications, and reduced street parking, speed limits, and travel lanes. Please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs. Check out our Project [video](#) for more details on how we are building the traffic deck. The purple area on map below illustrates the area of work.

Please note, this information is current at the time of sending, however schedules are subject to change. BSPC will share more specific timeframes in advance of the work happening. For the most current details, visit www.broadwaysubway.ca.
