

Traffic deck installation at the future Arbutus station starts in May – Some Night Work

April 12, 2022

The Broadway Subway Project Corporation (BSPC) is in your neighbourhood building an at-grade, safe and consistent four-lane traffic deck. This work will involve placing support beams and deck plates at night and then bolting the traffic deck in place during the day. Work will begin on the south side and is expected to shift to the north side of W. Broadway this summer. The traffic deck will be completed in the fall of 2022.

Residents and businesses will experience some noise and vibration during the installation and bolting of the traffic deck. People in the area should expect an increase of heavy machinery, congestion, temporary lane shifts and closures, and reduced speed limits and travel lanes. We also anticipate sidewalk and crosswalk modifications on Arbutus St. at W. Broadway. Please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs. Check out our Project [video](#) for more details on how we are building the traffic deck. The red shaded area on map below illustrates vehicle restrictions.

Please note, this information is current at the time of sending, however schedules are subject to change. BSPC will share more specific timeframes in advance of the work happening. For the most current details, visit www.broadwaysubway.ca.
