

Update: Rock-breaking upcoming in the Mount Pleasant Area

July 28, 2022

Note: The notice from [May 16, 2022](#) included this work and we now have current scheduling, traffic details, and impacts to share. The Broadway Subway Project Corporation (BSPC) is in your neighbourhood building the Mount Pleasant Station. As part of this work, BSPC has completed excavation beneath the traffic deck in preparation for the construction of the below ground station box. Excavation for the above ground station entrance and vent shafts (shown in map as “Quebec Street closures”) is anticipated to be completed in late summer.

As part of the excavation process, areas of hard rock may be uncovered, which will result in elevated noise during rock-breaking. Residents and businesses in the area can expect intermittent concussive sounds and vibrations emanating from the site during the rock breaking activities. General work in this area is permitted to occur between 6 a.m. and 11 p.m. with noisiest work, like rock-breaking, complete by 8 p.m.

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. We will continue to keep you informed in advance of any local work now and in the future to help you plan accordingly. Thank you for your patience.

Updates will be provided at broadwaysubway.ca/construction, and the location of the work can be viewed on a map at: broadwaysubway.ca/construction/maps/.
