

Update: Hours of work at the future South Granville Station

October 6, 2022

We have further details to share since the notification of Project working hours on March 11, 2022.

The Broadway Subway Project Corporation (BSPC) is working hard to complete major construction activities as we build the Broadway Subway Project. As we move to the excavation stage of the new underground station, we have extended our working hours into the evening. Crews will conduct most work between 6:00 a.m. and 10:00 p.m., with site clean-up and preparation work extending to 12:00 a.m. Please note the Project also has the ability to work 24/7 and we will provide further notifications in advance of specific overnight activities.

Access to residences, businesses, and parking garages will be maintained during all work activities. Residents and businesses in the area should expect elevated noise, sidewalk modifications, temporary lane closures, reduced street parking, and lower speed limits. Please plan extra travel time, watch for wayfinding information, and obey traffic control personnel and all signs.

To help mitigate noise from construction, the Project:

- Works to complete the noisiest part of the work during the daytime where possible or before 10:00 p.m.;
- Constructs sound barriers at strategic locations;
- Minimizes the need for machinery backing up; and
- Installs white noise back-up signals on equipment.

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. We will continue to keep you informed in advance of work to help you plan accordingly. Check the website for updates on all construction activities at broadwaysubway.ca/construction. Thank you for your patience.
