

Geotechnical investigations on W. Broadway at Heather and Burrard streets beginning on October 31

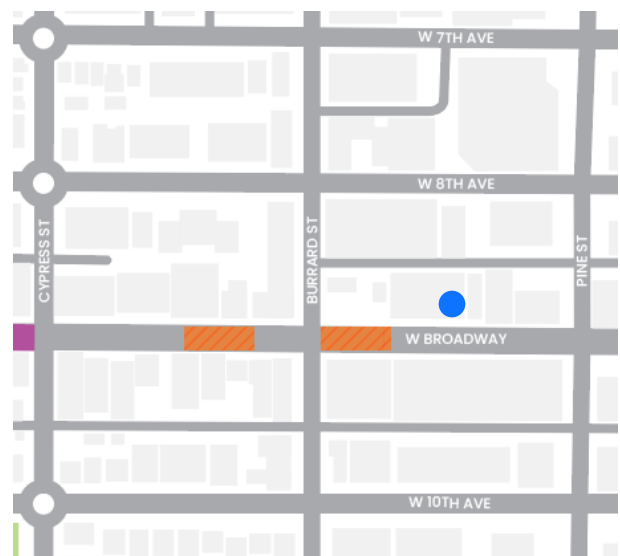

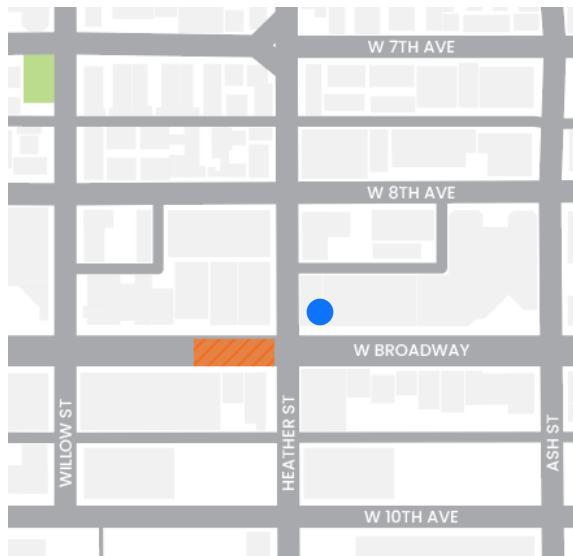

October 27, 2022

The Broadway Subway Project Corporation (BSPC) will be conducting geotechnical investigations in your neighbourhood to collect information that will inform planning for tunnel construction. Work will take place for about one week from 10 a.m. to 3 p.m. on W. Broadway at Heather Street beginning October 31 and then at Burrard Street beginning on November 3. In mid-November, crews will return to W. Broadway at Burrard Street for additional geotechnical investigations. The work areas are shown in orange in the maps below. Work activities will include removal of asphalt, excavation using a hydrovac truck, placing of road plates, installation of sensor equipment, and repaving the areas. The #99 B-Line eastbound bus stop at Heather Street will move from the west side to the east side of Heather Street from October 31 for up to one week. Bus stops are shown below with a blue dot.

What to Expect

Access for all abilities will be maintained to residences, businesses, and services. People in the area can expect elevated noise levels, temporary vehicle lane restrictions, some traffic congestion, reduced speeds, and to be detoured around the work as required. Please plan extra travel time, watch for wayfinding information, and obey traffic control personnel and all signs. We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you in advance for your patience.

Please note, this information is current at the time of sending; however, schedules are subject to change. Visit www.broadwaysubway.ca for current details.

Updates will be provided at broadwaysubway.ca/construction.
