

Update: Utility relocation continues on Arbutus St. from W. Broadway to W. 10th Ave. – Lane restrictions and Night Work – October 31 through November

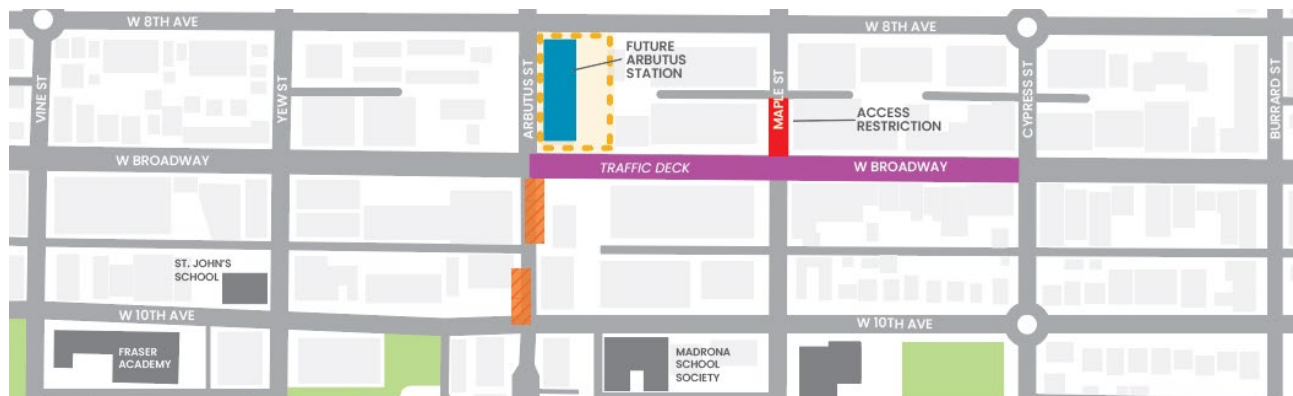

October 28, 2022

Note: The notice from [October 19, 2022](#) includes this work and we have updated scheduling to share.

The Broadway Subway Project Corporation (BSPC) has relocated a watermain in your neighbourhood ahead of building the Arbutus Station. This watermain will be reconnected to Vancouver’s existing distribution system by Metro Vancouver. Beginning on October 31, Metro Vancouver will be performing this tie-in work in collaboration with BSPC. The work will require the continued closure of the northbound lane on Arbutus St. from the laneway north of W. 10th Ave. to W. Broadway. Southbound vehicle access will be maintained on Arbutus St. during this time. Additionally, work at W. 10th Ave. will temporarily eliminate the westbound right turn onto W. 10th from Arbutus St. for vehicles. Vehicles are advised to take Cypress, Burrard, Maple, or Vine streets as alternate routes. Cyclist and pedestrian access for all abilities will be maintained to residences, businesses, and services. The work areas are shown in orange below, with red indicating other current street closures. The tie-in work will be performed during the day and night by Metro Vancouver’s team beginning on October 31 for about two weeks. Subsequently, BSPC will complete filling in and re-paving the work area, which is expected to be conducted during the day later in November. Lane restrictions will be in effect through November.

What to Expect

People in the area can expect elevated noise levels during day and night from increased truck traffic, and generators and water pumps; overnight light sources; some traffic congestion; reduced speeds; and to be detoured around the work as required. Please plan extra travel time, watch for wayfinding information, and obey traffic control personnel and all signs. There is a small possibility of increased cloudiness (turbidity) of water as a result of this work. This cloudiness should disappear within a few hours. Even with increased cloudiness, water is still safe to drink. If your water is cloudy, run your cold water tap until water clears. If you have questions about water quality or this work, please reach out to Metro Vancouver at icentre@metrovancouver.org or 604-432-6200 (8:30 am to 4:00 pm). We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you in advance for your patience. *This information is current at the time of sending; however, schedules are subject to change.*

Updates will be provided at broadwaysubway.ca/construction.
