

First major concrete pour at the future South Granville Station on July 29

July 25, 2023

The Broadway Subway Project Corporation (BSPC) is in your neighbourhood building the future South Granville Station. On July 29, crews will complete the first major concrete pour for the station's foundation. Approximately 130 trucks will pour more than 1,000 cubic meters of concrete during the day, with additional pours of varying volumes over the coming months.

Timing

For each major pour, set up on site will begin around 5 a.m., with the first concrete truck arriving at 6 a.m. The concrete pour is scheduled until 10 p.m. with low noise work continuing overnight to finish related activities.

What to expect

- Some elevated noise related to trucking. Concrete trucks are required to have their engines running at all times to keep their drums turning, and to use traditional back-up alarms for crew safety.
- Increased trucking activities.
- Traffic changes include:
 - W. Broadway between Granville and Hemlock streets will be reduced to one lane in each direction.
 - Westbound left turns will be restricted from W. Broadway onto Granville and Hemlock streets.
 - Eastbound left turns from W. Broadway onto Hemlock Street will also be restricted.
 - Drivers travelling westbound on W. Broadway wishing to turn south are advised to use Fir Street.
- Overnight lighting focused on our sites to ensure crew safety.
- Access to residences, businesses, and parkades will be maintained during all work activities.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Please plan extra travel time, watch for wayfinding information, and obey traffic control personnel and all signs.

Thank you in advance for your patience. Updates will be provided at www.broadwaysubway.ca/construction.
