

Mount Pleasant Station construction continues through fall 2024 – includes intermittent night work

September 20, 2024

The future Mount Pleasant Station is taking shape in your neighbourhood. Through the fall, crews continue to focus on constructing the underground station, including walls and floors. To complete this work efficiently, we will continue working primarily during the day and intermittently overnight. We remain committed to keeping residents and businesses updated on our progress as we advance this major transit project in your community.

What to expect during daytime work

- Regular work hours are Monday to Saturday from 6 a.m. until 10 p.m. There may be occasional work on Sundays and holidays.
- Some elevated noise during specific activities.
- Temporary traffic changes and increased trucking activity related to material delivery and concrete pours.
- Pedestrians will be detoured around work as required.

What to expect at night

- When overnight work is required, work hours can range from 10 p.m. to 6 a.m.
- Overnight lighting focused on our sites to ensure crew safety.

We strive to minimize impacts of construction activities on our neighbours, and we are regularly monitoring and adapting mitigations as needed.

When travelling through construction zones, please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you for your continued patience while we build this important transportation infrastructure.

Further details

Construction Activities

- Concrete pours.
- Deliveries of materials using trucks and cranes.
- Welding, waterproofing, and rebar installation, carpentry and mechanical and electrical work.
- Station construction is expected to continue through 2026.

Traffic

- No street parking on Broadway between Quebec and Main streets.
- Temporary lane closures between 10 a.m. and 3 p.m., overnight or on weekends may be implemented to support construction activities and deliveries:
 - Main Street southbound curb lane south of E. Broadway; and
 - E. Broadway eastbound curb lane between Quebec and Main streets.

Impacts

- Some elevated noise related to activities that include, but are not limited to, rebar installation, crane movement and deliveries.
- During concrete pours, trucks are required to keep their engines running to keep their drums turning, and use traditional back-up alarms for crew safety.
- Trucking activity to accommodate deliveries of equipment and materials during the day or night.
- Lighting focused on our sites to ensure crew safety.

Mitigations

- Mitigation measures include, but are not limited to:
 - Noise barriers installed around some sources of noise.
 - White noise back-up signals on equipment when possible.
 - Directing lights away from residential buildings.
 - Using quieter models of equipment at night, such as hand tools.
- For more information about parking on Broadway, check our [parking and access maps](#) page.
