Spring 2025 update on South Granville Station construction – includes intermittent night work

April 3, 2025

Concrete activities to build the concourse-level floors of the future South Granville Station are almost complete, and work is now progressing upwards, closer to the traffic deck and street level. Throughout spring 2025, we will focus on the second level of the station. Activities include regular concrete pours for the station structure, the relocation of key utilities in the area, and track installation in the tunnels. Curious to learn more about how track is installed? Check out our [infographic](#).

To complete this work efficiently, we will continue working primarily during the day and intermittently overnight. We remain committed to keeping residents and businesses updated on our progress as we advance this major transit project in your community.

What to expect during daytime work

- Typical hours of work are from Monday to Saturday from 6 a.m. until 10 p.m. There may be occasional work that starts earlier or work on Sunday and holidays.
- Some elevated noise during specific activities.
- As work areas become enclosed, ventilation fan activity has increased to comply with WorkSafeBC requirements. Fans will be active during all hours of work to ensure the safety of crews.
- Utility relocation work between Hemlock and Granville streets.
- Temporary traffic changes related to materials delivery and concrete pours.

What to expect at night

- When overnight work is required, work hours can range from 10 p.m. to 5 a.m.
- Overnight lighting focused on our sites to ensure crew safety.
- Some work to relocate utilities will take place at night to minimize service disruptions.

We strive to minimize impacts of construction activities on our neighbours, and we are regularly monitoring and adapting mitigations as needed. See below for further information.

When travelling through construction zones, please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you for your continued patience while we build this important transportation infrastructure project.

Further details

Construction Activities

- Pouring concrete.
- Delivering materials using trucks and cranes.
- Welding, waterproofing and rebar installation under the traffic deck.
- Excavation, trenching, pipe installation and backfilling related to utility relocation between Hemlock and Granville streets.
- Installing tracks inside the tunnels.
- Station construction is expected to continue through 2026.

Traffic

- Regular temporary lane closures on W. Broadway on weekdays between 10 a.m. and 3 p.m., overnight or on weekends to support construction activities.
- Temporary lane closures on W. Broadway, Hemlock Street and 8th Avenue may be implemented.
- Short-term lane closures on W. 10th Avenue between Granville and Hemlock streets, as well as the lane east of Granville will be implemented during utility relocation work.
- Temporary turning restrictions at Granville Street to support some activities.

Impacts

- Some elevated noise related to activities that include, but are not limited to, rebar installation, crane movement, ventilation fans and deliveries.
- Concrete trucks are required to keep their engines running to keep their drums turning and use traditional back-up alarms for crew safety.
- Trucking activity to accommodate deliveries of equipment and materials during the day or night.
- Lighting focused on our sites to ensure crew safety.

Mitigations

Mitigation measures include, but are not limited to:

- Noise barriers installed around some sources of noise.
- White noise back-up signals on equipment when possible.
- Directing lights away from residential buildings.
- Using quieter models of equipment at night, such as hand tools.
- Access will be maintained to residences, businesses, and services.
