Update on Mount Pleasant Station construction – Summer 2025

June 17, 2025

The last section of the station roof is expected to be poured in June, completing the main underground structure of the future Mount Pleasant Station. Throughout summer 2025, activities will focus on constructing the above ground station entrance, continuing track works in the tunnel, and installing permanent utilities. In late summer, work will also resume on the emergency exit and ventilation shaft on Quebec Street. Curious to learn more about how track is installed? Check out our [infographic](#).

To complete this work efficiently, we will continue working primarily during the day and intermittently overnight. We remain committed to keeping residents and businesses updated on our progress as we advance this major transit infrastructure project in your community.

What to expect during daytime work

- Regular work hours are Monday to Saturday from 6 a.m. until 10 p.m. There may be occasional work on Sundays and holidays.
- Some elevated noise during specific activities.
- Ventilation fans are required to comply with WorkSafeBC requirements and will be active during all hours of work to ensure the safety of crews.
- Temporary traffic changes related to the delivery of materials and concrete pours.
- Temporary lane closures and changes to pedestrian access to accommodate deliveries and trucking activity.

What to expect at night

- When overnight work is required, work hours can range from 10 p.m. to 6 a.m.
- Overnight lighting focused on our sites to ensure crew safety.

We strive to minimize impacts of construction activities on our neighbours, and we are regularly monitoring and adapting mitigations as needed. See below for further information.

When travelling through construction zones, please plan extra time, watch for wayfinding information, and obey traffic control personnel and all signs.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you for your continued patience while we build this important transportation infrastructure project. For photos of construction progress at all six future stations visit the Broadway Subway Project [Flickr album](#).

Further details

Construction Activities

- Pouring concrete.
- Delivering materials using trucks and crane.
- Welding, waterproofing and installing rebar.
- Activities to support construction and track installation inside the tunnels.
- Utility work between Quebec and Main streets.
- Station construction is expected to continue through 2026.

Traffic

- For more information about parking on Broadway, check our parking and access maps page.
- Temporary lane or sidewalk closures may be implemented to support construction activities and deliveries:
 - Main Street southbound curb lane and/or west sidewalk south of E. Broadway; and
 - E. Broadway eastbound curb lane between Quebec and Main streets.

Impacts

- Some elevated noise related to activities that include, but are not limited to, rebar installation, crane movement, ventilation fans and deliveries.
- Concrete trucks are required to keep their engines running to keep their drums turning and use traditional back-up alarms for crew safety.
- Trucking activity to accommodate deliveries of equipment and materials during the day or night.

Mitigations

Mitigation measures include, but are not limited to:

- Noise barriers installed around some sources of noise.
- White noise back-up signals on equipment when possible.
- Directing lights away from residential buildings.
- Using quieter models of equipment at night, such as hand tools.
- Access for all abilities will be maintained to residences, businesses, and services.
