South Granville Station – Night Work on August 12

August 7, 2026

Crews are continuing construction of the future South Granville Station, as work progresses inside and outside the station. Night work to complete utility installations will take place on August 12.

The utility tie-in is scheduled overnight when sanitary sewer flows are significantly lower. This approach minimizes impacts to daytime sanitary sewer use while helping to ensure the health and safety of crews performing the work.

We'll continue to share updates as this important project moves ahead in your neighbourhood. Further details are available below.

Construction Activities

- On August 12, utility work will take place at W. 10th Avenue and the laneway entrance between Granville and Hemlock streets from 7 p.m. to 6 a.m. We aim to complete the noisiest work before 11 p.m., with low-noise work continuing into the morning.
- Activities may include but are not limited to increased truck traffic and hydrovac work.

What to expect

- Overnight lighting and equipment will be in the enclosed utility work area.
- Some elevated noise. A dewatering pump will be in place during the duration of this work.
- We strive to minimize impacts of construction activities on our neighbours, and we are regularly monitoring and adapting mitigations as needed.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you for your continued patience while we build this important transportation infrastructure project.
