

South Granville Station – Scheduled Night Work on September 24 and 25

September 18, 2026

Crews are continuing construction of the South Granville Station and are working on permanent utilities for the new station. Overnight work is planned on Thursday, September 24, and Friday, September 25, to complete a water main tie-in within the station enclosures north of Broadway, between Granville and Hemlock streets.

The water main utility tie-in is scheduled overnight when flows are significantly lower. This approach minimizes impacts to the neighbourhood in the daytime.

Construction Activities

- For two nights on September 24 until September 25 and from September 25 until September 26, crews will be working inside the station enclosures north of W. Broadway from 7 p.m. to 7 a.m.
- Activities include, but are not limited to, hydrovac work, excavation, pipe installation, bypass implementation and truck movements.

What to expect

- Overnight lighting and equipment will be in the enclosed utility work area.
- A hydrovac will be used to support safe working conditions for crews.

Mitigations

Mitigation measures include, but are not limited to:

- Noise barriers installed around hydrovac where feasible.
- White noise signals installed on construction equipment.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. Thank you for your continued patience while we build this important transportation infrastructure project.
