

South Granville Station – scheduled night work on October 8

October 7, 2026

Crews are continuing to restore the road above South Granville Station. To support this work, concrete barriers will be installed on the north side of W. Broadway between Granville and Hemlock streets within the construction site. These barriers will be installed as a safety measure in preparation for the next stage of traffic deck removal activities.

The barriers will be installed overnight when traffic volumes are lower, helping to minimize impacts to the neighbourhood during the daytime.

Construction Activities

- Work hours are between 7 p.m. on October 8 and 5 a.m. on October 9.
- Activities include, but are not limited to, concrete barrier installation, and materials and truck movements.

What to expect

- Overnight lighting focused on our work area to ensure crew safety.
- Broadway will be reduced to one lane in each direction between Granville and Hemlock streets, with left-turn restrictions in place. There will be no changes to sidewalks during this work.
- Access to services, businesses and residences are maintained.

Mitigations

Mitigation measures include, but are not limited to:

- Noise barriers installed around equipment where feasible.
- White noise signals installed on construction equipment.
- Directing lights away from residential buildings.

Thank you for your patience

We know that construction can be disruptive, and we are working hard to minimize impacts in your neighbourhood. .
